**Hand & Body Lotion** contains a balance of vitamins and minerals including zinc and copper peptides, biotin, alpha-lipoic acid, ascorbyl DMAE, and Vitamin E. The specialized formula provides nutrients crucial to optimum skin health. This creamy lotion smooths the skin and increases radiance, promoting the appearance of healthier, younger looking skin.

The skin is the body’s largest organ and is the number one defense against germs. It is important to maintain the moisture of the skin to prevent skin breakdown. When the skin breaks down it enables bacteria and viruses to enter the body causing sickness, such as colds and flu. Most people are not even aware of the microscopic lesions in the hands and feet through which germs can enter. Good hand washing along with the use of MBi Nutraceuticals’ Hand & Body Lotion will help maintain the largest organ and defend the body against harmful bacteria and viruses.

**Brings Balance**

**Keeping skin healthy**
Along with virus and bacteria damage to the skin; time, weather, pollution, and ultraviolet radiation can also damage the appearance of the skin. Combat these elements by minimizing exposure to environmental elements, and give the skin the protection and nutrients it needs. Nutrients such as vitamins A, E, and C can help protect the skin from free-radical damage and provide cell nourishment. MBi Nutraceuticals’ Hand & Body Lotion gives skin the moisture and nourishment it needs to look and feel healthy.

**Highlights of a few of the beneficial ingredients in Hand & Body Lotion**

**Alpha Lipoic Acid** is an antioxidant. It helps the body use Vitamin C as ascorbic acid in collagen synthesis. It also works with pantothenic acid in the synthesis of skin amino acids and other skin components. Collagen, the major protein in skin and joints, keeps the skin tight and supple and the joints healthy.

**Ascorbyl DMAE** is a natural surfactant harvested from fish complexed with Vitamin C. It is a natural component of all cells. It functions to strengthen, smooth, and elasticize tissues and transport nutrients to the cells. This form of Vitamin C doesn’t sting or irritate the skin.

**MSM** is rapidly absorbed through the skin to nourish connective tissue.

**Zinc and Copper Peptides** increase the dermal levels of collagen, elastin, and the water-holding proteoglycans and glycosaminoglycans, reversing skin aging.

**Polyphenols** are catechins derived from green tea extracts. Catechins trap free radicals that damage the skin up to three times better than Vitamin C. Catechins also retard the growth of harmful bacteria in the skin.
MBi Nutraceuticals’ Hand & Body Lotion is a blend of nutrients crucial to optimum skin health combined in a creamy lotion

It is quick absorbing and helps lock moisture into the skin while nourishing it, without leaving a greasy residue behind. It is a rejuvenating moisture treatment for the entire body.

Processing

On-site laboratories are constantly monitored and tested by expert chemists and microbiologists to ensure consistent quality of raw materials, product batches, and finished products.

Vitamin and mineral analyses are conducted to validate the product content and specifications, assuring high quality.

Manufacturing Standards

MBi Nutraceuticals operates its own manufacturing facility. Our standard operating procedures are based on “Current Good Manufacturing Practices”. MBi ensures the highest quality nutraceuticals by applying our manufacturing procedures to every nutritional, herbal, food, homeopathic, and personal care product we make.
